

Dear FCC Members;

It is imperative that the freedom of the press not be further eroded by allowing the airwaves and other media to be controlled by business people whose entire concern is profit. Already we have "interesting news," which is entertainment in the guise of news. There are many forms of unhealthy policy; mind control and trivialization may well be the worst and do the most damage to our country. We need you to be statespeople who will address this issue in spite of pressures put on you by media business moguls. Our nation and its people understand the enormity of your responsibility. Please do not let us down.
Thank you. Margaret W. Young
currently allowed.

These are public airwaves, not corporate property.

Do not allow information to be limited to a conglomeration trying to serve themselves first and control opinions.

Thanking you in advance for your denial of changes in the Percentages allowed under current rules.

Sincerely,
June M.Gates
